

ORDER

4650.21C

**MANAGEMENT AND CONTROL OF IN-USE PERSONAL
PROPERTY**

May 02, 2002

**DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION**

RECORD OF CHANGES

DIRECTIVE NO.

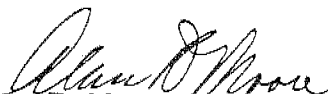

4650.21C

[illegible]

FOREWORD

This order establishes the standards and procedures, and assigns responsibilities for the management and control of Federal Aviation Administration's (FAA) in-use personal property. This order includes property recordation criteria and guidance concerning forms processing, data entry, and file maintenance. It also provides criteria and guidance necessary to conduct and reconcile a physical inventory of in-use personal property.

The expressed intent of this order is to avoid waste, eliminate fraud or abuse of property, and minimize, to the maximum extent practical, mismanagement of Government property. Each FAA employee has responsibilities for property accountability, safekeeping, and proper use. It is each employee's responsibility to promptly report all known or suspected incidents of property abuse, fraud, and theft to their supervisor, the property custodian, and the headquarters/region/center Security Divisions. Misuse of an official position or function resulting in a compromise or violation of this directive, Federal Property Management Regulations, or public law shall be reported directly to their managers. Misuse or abuse of property will have direct consequence to employees as depicted in the Federal Aviation Personnel Manual Letter 2635, Conduct and Discipline, dated November 16, 1989. Appendix 1, Table of Penalties, identifies the penalties for loss, theft, damage, or endangering Government property.

Alan R. Moore
Director of Airway Facilities

TABLE OF CONTENTS

Paragraph	Page
CHAPTER 1. GENERAL	
1-1. Purpose	1-1
1-2. Distribution	1-1
1-3. Cancellations	1-1
1-4. Explanation of Changes	1-1
1-5. Background	1-1
1-6. Scope	1-2
1-7. Definitions	1-3
1-8. Acronyms	1-3
1-9. Forms	1-4
1-10. Objectives	1-4
1-11. References	1-4
1-12. Additional Tools	1-6
CHAPTER 2. RESPONSIBILITIES	
2-1. General	2-1
2-2. NAS Logistics Property Management Division	2-1
2-3. Headquarters/Regions/Centers	2-2
2-4. Property Officers	2-2
2-5. In-Use Property Custodians	2-4
2-6. FAA Employees and Contractors	2-5
2-7. Office of Financial Management	2-6
2-8. Office of Information Services	2-6
2-9. Office of Acquisition Services	2-6
CHAPTER 3. ACCOUNTABLE IN-USE PERSONAL PROPERTY MANAGEMENT CRITERIA	
3-1. General	3-1
3-2. Accountable Property	3-1
3-3. Non-Accountable Property	3-1
3-4. Control of In-Use Personal Property	3-2
3-5. Asset Classification and Ownership	3-2
3-6. Government Furnished Property/Contractor Acquired Property	3-2
3-7. Special Property Considerations	3-3
3-8. Property Identification Number (PIN) or Bar Code Number (BCN)/Labels	3-4
3-9. Recordation of Property Value	3-5

CHAPTER 4. PERSONAL PROPERTY IN-USE MANAGEMENT SYSTEM (PPIMS) SYSTEM STANDARDS

4-1.	General	4-1
4-2.	PPIMS Access	4-2
4-3.	PPIMS Data Elements	4-2
4-4.	Source Documents	4-2

CHAPTER 5. PROCESSING REQUIREMENTS

5-1.	Creating a Record	5-1
5-2.	Regional Project Materiel Management System (RPMMS) Interface	5-1
5-3.	Facility Table and NSN Updates	5-2
5-4.	Field Inventory Replenishment System (FIRS) Interfaces	5-3
5-5.	Additions/Increases	5-5
5-6.	Property Transfers	5-6
5-7.	Property Deletions	5-8
5-8.	Property Record Adjustments	5-8
5-9.	Custodial Reporting in the Absence of Supporting Documentation	5-10
5-10.	PPIMS Field Input	5-10

CHAPTER 6. PHYSICAL INVENTORY

6-1.	Inventory Requirement	6-1
6-2.	Conducting Inventories	6-2
6-3.	Types and Frequencies of Inventories	6-2
6-4.	Preplanning Activities Guidelines	6-3
6-5.	Taking Physical Inventories	6-4
6-6.	Resolving Inventory Discrepancies	6-4
6-7.	Discrepancy Research and Record Adjustment	6-4
6-8.	Inventory Adjustment	6-5
6-9.	Preparation of Inventory Adjustments	6-6
6-10.	Authentication of Inventory Adjustments	6-6
6-11.	Documentation	6-7
6-12.	Criteria for Waiver of Inventory	6-7

CHAPTER 7. PROPERTY MANAGEMENT REPORTS

7-1.	General	7-1
7-2.	Preparation and Distribution	7-1
7-3.	Daily Processed Transaction List (PP101)	7-1
7-4.	Monthly Processed Transaction List by Cost Center (PP312)	7-1

CHAPTER 1. GENERAL

1-1. **PURPOSE.** This order establishes standards, assigns responsibilities, and prescribes procedures for the management and control of FAA In-Use Personal Property (hereafter referred to as "program"). This Order also implements the Federal Property Management Regulations (FPMR) and the latest version of Order DOT H 4410.4, Equipment Management and Control.

1-2. **DISTRIBUTION.** This order is distributed to the division level in the Washington headquarters, regions, and centers; and a standard distribution to all field offices and facilities.

1-3. **CANCELLATION.** Order 4650.21B, Management and Control of In-Use Personal Property, dated March 12, 1985, is canceled.

1-4. **EXPLANATION OF CHANGES.** Changes to this Order include the following:

- a. Updates current organizational structure.
- b. Provides new Accountable Equipment Category.
- c. Updates appendices to include form revisions, acronyms, and definitions.
- d. Provides a sample of Form DOT F 1660.2, Property Removal Record, from DOT H 4410.4, Equipment Management and Control.

1-5. **BACKGROUND.** Section 202(b) of the Federal Property and Administrative Services Act of 1949, PL. 81-152, as amended (40 U.S.C. 483(b)), requires that each executive agency establish procedures for the management of property under its control. Section 205(c) Act (40 U.S.C. 486(c)) requires such agency heads to issue Orders and directives to carry out General Services Administration (GSA) property management regulations. The latest version of Order DOT 4410.4, Equipment Management and Control, directs each operating Administration to develop a management system with standards and procedures necessary to ensure adequate control and accountability. The latest version of Handbook DOT H 4410.4, Equipment Management and Control, provides policy for the management, accountability, control, utilization, and disposal of government-owned, leased, and/or borrowed equipment. Standards for property accountability must also comply with the General Accounting Office (GAO) Policy and Procedures Manual.

1-6. **SCOPE.** This Order addresses all FAA in-use personal property, which is defined as nonexpendable property assigned to a custodial area which is serving its intended operational purpose and for which accountable records and controls should be maintained. Personal property is complete if it is of a durable nature with an expected service life of 2 years or more, does not ordinarily lose its identity when placed in use, and is permanent in nature. This is applicable to all FAA organizations using and/or managing in-use personal property with the exception of the following:

a. Real property as defined in the latest version of FAA Order 4660.1, Real Property Handbook.

b. Project Materiel as defined in the latest versions of:

(1) Order 4650.7, Management of NAS F&E Project Materiel.

(2) FAA Order 4650.30, Management and Control of NAS Facilities and Equipment (F&E) Projects/Materiel.

c. Property held in an inventory issue:

(1) Office supply bins

(2) Aircraft maintenance bases (AMB)

(3) Administrative stockrooms

(4) Technical stockrooms

(5) Regional warehouse

(6) Facility support stocks

(7) Field Spares, as defined in the latest version of FAA Order 4250.9, Field Materiel Management.

(8) FAA Logistics Center operating inventory, as defined in the latest version of FAA Order 4633.1, Physical Inventory, including:

(a) Operating stock

(b) Project materiel

(c) Exchange and repair

(9) William J. Hughes Technical Center (ACT)

d. Property in possession of foreign countries as determined by the Office of International Aviation.

e. Records for the government, as defined in the latest version of FAA Order 1350.15, Records Organization, Transfer, and Destruction Standards.

f. Library materials are inventoried in accordance with the latest version of FAA Order 1750.13, FAA Library Program. Reference paragraphs 28-31.

g. Narcotics and hypnotics are inventoried in accordance with the latest version of FAA Order 9000.2, Control and Disposition of Narcotics and Dangerous Drugs.

h. Subsistence supplies for resale are inventoried in accordance with the latest versions of the following:

(1) FAA Order 4950.1, Vending Facility Program, paragraph 62 (GFE).

i. Surplus personal property that has not physically moved from agency custody that has disposition instruction, and that is to be disposed of by transfer, sale, destruction, abandonment, scrap, or salvage, in accordance with the latest version of FAA Order 4800.2, Utilization and Disposal of Excess and Surplus Personal Property.

j. Property and equipment having an acquisition cost of less than \$2,500 that does not meet the accountable equipment criteria as defined in Appendix 6.

k. Firearms that are inventoried in accordance with FAA Order 1600.69, FAA Facility Security Management Program, Appendix 12, Section 2, Inventory Requirements. This does not apply to the Alaskan Region or the William J. Hughes Technical Center.

l. Cryptographic equipment that is inventoried in accordance with the latest version of FAA Order 1600.8, Communications Security, Chapter 4, and Appendix 12, Section 7.

1-7. **DEFINITIONS.** Appendix 1, Definitions, contains definitions used in this order.

1-8. **ACRONYMS.** Appendix 2, Acronyms, contains acronyms used in this order.

1-9. **FORMS.** Appendix 3, PPIMS Source Documents, contains a listing of forms and their titles relating to this order.

1-10. **OBJECTIVES.** The objectives of the FAA's in-use personal property program is to ensure the effective and efficient use of agency property required to carry out the agency's mission and to minimize the potential for waste, fraud, abuse, and mismanagement of Government personal property.

This role also includes meeting the agency's mission and the requirements of Federal laws and regulations, GAO policy, Department, and administrative directives. The objectives include:

- a. Establish a management and control policy to ensure property is protected against waste, fraud, abuse, and unauthorized use.
- b. Establish accountability for in-use personal property and ensure personnel are aware of vital roles and responsibilities for safeguarding and accounting of property.
- c. Demonstrate effectiveness in program management, financial control, and compliance with Federal regulations.
- d. Provide agency personnel the means by which the management of all in-use personal property requirements is met.

1-11. **REFERENCES.** The following references are listed for information purposes, and may not be referenced elsewhere in this Order:

CHAPTER 2. RESPONSIBILITIES

2-1. **GENERAL.** This chapter defines the responsibilities of organizations and property management personnel with respect to the management and accountability of in-use personal property. Offices, services, regions/center/headquarters offices are responsible for the effective administration of in-use personal property management, accountability, and control of in-use personal property for which they have assigned responsibility.

2-2. **NAS LOGISTICS PROPERTY MANAGEMENT DIVISION.** The Resource Management Program, NAS Logistics Property Management Division, AFZ-500, is responsible for agency-wide management of in-use personal property. The AFZ-500 Division Manager serves as the FAA Property Management Officer (PMO). The PMO:

- a. Develops, standards, procedures, and system requirements to ensure in-use personal property is accounted for physically and financially.
- b. Reviews in-use personal property training courses and recommends changes through the National Materiel Management Training Program.
- c. Serves as the national focal point for coordination with the Office of Financial Management (AFM), Assistant Administrator for Information Services/CIO (AIO), and other headquarters offices and services on all program matters impacting the management of FAA in-use personal property.
- d. Acts as liaison for the FAA in matters relative to in-use personal property which involve the Office of Secretary of Transportation (OST), the General Services Administration (GSA), and other government agencies and departments.
- e. Ensures that applicable agency directives are adequate in meeting all legal, regulatory, and directive requirements for effective and efficient management of in-use personal property.
- f. Ensures that all Property Officers are fully aware of their responsibilities for the management of in-use personal property.
- g. Monitors the FAA's in-use personal property management program to ensure system integrity and effectiveness.
- h. Coordinates, approves, and effects changes to the in-use personal property management program which can simplify, standardize or streamline the processes or reduce the workload associated with the program.

i. Ensures appropriate training is available for agency employees involved in the management of in-use personal property.

2-3. **HEADQUARTERS/REGIONS/CENTERS.** Headquarters, regions, and centers are responsible for the effective administration of in-use personal property management, accountability, and control of property for which they have assigned responsibility.

2-4. **PROPERTY OFFICERS.** This is the individual responsible for all personal property within a region/center or headquarters. The Property Officer is responsible for ensuring the management of the region/center or headquarters personal property programs. They may delegate any of the following responsibilities for the In-Use Personal Property Program to the In-Use Personal Property Officer:

a. Designate in writing by organizational position the property custodian of each custodial area within the Region/Center/Headquarters. See Appendix 4 for a sample Delegation of Authority letter.

b. Issue supplements to this Order as required, including establishing responsibilities and specific procedures for following up and reconciling items remaining in the Personal Property In-Use Management System (PPIMS) suspense file over 90 days.

c. Assign property custodian responsibilities to organizational levels not lower than:

(1) The manager of each Air Traffic Control Tower, Automated Flight Service Station (AFSS) or Flight Service Station (FSS), Flight Standards District Office (FSDO), Systems Management Office (SMO), and/or Air Traffic Manager/Assistant Manager who report directly to the Region/Center/Headquarters office. This includes the field office supervisory level.

(2) The section supervisor or higher (i.e. branch manager, division manager or program directors or equivalent) for offices at the FAA headquarters, regional headquarters, the Mike Monroney Aeronautical Center, and the William J. Hughes Technical Center. To avoid conflict of interest, the Property Officer shall not be designated as a Property Custodian. In locations where there are Contracting Officers, team leads, and staff positions at remote sites, the property officer can delegate authority to allow full time permanent individuals occupying non-specific positions as property custodians

d. Ensure that the Property Custodians have current records of the property for which they are responsible.

e. Ensure that each Property Custodian is advised of standards and procedures, their roles and responsibilities, and that they receive adequate training to perform tasks related to property accountability.

f. Ensure that accurate, complete, and timely update of records to the field are made in accordance with the standards, and procedures contained in this Order.

g. Ensure that survey reports for lost, damaged, or destroyed personal property are promptly prepared, accurate, and submitted by the Property Custodian and processed in accordance with applicable agency directives.

h. Evaluate the effectiveness of FAA policies, systems, standards, and procedures for in-use personal property and recommend any required modifications to the NAS Logistics Property Management Division, AFZ-500.

i. Provide personal property related information, advice, and assistance to all region/center or headquarters personnel.

j. Ensure the effective administration, maintenance, and operation of the in-use personal property management program within the Region/Center/Headquarters.

k. Provide guidance and assistance to property management personnel so that they can adequately perform related personal property duties.

l. Monitor the program to ensure property management personnel perform their duties as outlined in this Order.

m. Ensure actions removing unrequired property from PPIMS are also reflected as additions of unrequired property in USD and are processed to both systems within the same month, i.e., clean audit requirement.

n. Coordinate actions for disposition of unrequired excess/surplus property and closeout of FAA project materiel, including partial and complete capitalization.

o. Evaluate the effectiveness of the program elements within the regions/centers/headquarters, identify weaknesses, and recommend corrective actions.

p. Participate in closeouts of work-in-progress projects that provide input into the personal property records.

q. Review and approve the Employee Clearance Record for all designated property custodians to ensure a joint change in custodian and inventory has been accomplished.

r. Approve adjustment actions submitted by property custodians that impact the in-use personal property records.

2-5. IN-USE PROPERTY CUSTODIANS. In-use property custodians manage the program within a specific custodial area (normally a cost center). This responsibility may only be assigned to an individual with supervisory or managerial oversight responsibility for the custodial area and should be assigned at the lowest managerial level feasible, such as a division, branch, section supervisor, or field office facility. In-use property custodians will:

a. Maintain current and accurate custodial records for all controlled and recorded in-use personal property within the assigned custodial area.

b. Initiate, process, and code source documents for receipts, adjustments, transfers, etc., which affect the control, recording, or custody of property, and notify the property manager of any discrepancies in the property records.

c. Ensure custodial employees preparing or receiving documents effecting in-use personal property records are fully aware of the procedures to be followed.

d. Ensure in-use personal property is given proper care, security, and protection and is used only for official Government purposes.

e. Ensure employees are aware of consequences of the theft or loss of property as stated in the Conduct and Discipline Handbook.

f. Ensure that property no longer required by the custodial area is promptly identified and reported.

g. Ensure survey reports for lost, damaged, or destroyed personal property are prepared promptly, accurately, and completely in accordance with FAA Order 4630.3C, Survey of Lost, Damaged, or Destroyed Government Property.

h. Conduct physical inventories in accordance with the standards established in this Order.

i. Apprise custodial area employees of their responsibilities to use and properly care for personal property and ensure they are adequately trained to accomplish these responsibilities.

j. Ensure that all in-use personal property in the custodial area is used only for official Government purposes.

k. Ensure that property custodians may not delegate this responsibility but may designate a representative responsible for supporting administrative work and duties. The signature authority for Reports of Survey and triennial and joint inventories shall not be delegated below the custodial level. When a designation of duties is made, a memo or e-mail message shall be provided in writing to the property manager. The following actions are required whenever there is a change of property custodian:

(1) The manager of the custodial area must provide a memo to the Property Officer advising of change of custodian in a format similar to the sample shown in Appendix 5, Sample Memorandum – Change of Custodian.

(2) A joint inventory shall be taken. While custodial designees may actually take the inventory, the incoming and departing custodians must sign for, and are responsible for the results of the inventory. If there is no incoming custodian available, the joint inventory shall be conducted between the outgoing custodian and the next higher level of supervision.

(3) In the event an outgoing custodian is unavailable to conduct a joint inventory, the responsibility for the outgoing custodian's inventory shall transfer to the next higher level of supervision.

2-6. FAA EMPLOYEES AND CONTRACTORS. The provisions of this paragraph apply to all in-use personal property regardless of value. All FAA supervisors, employees, and contractors shall:

a. Use Government equipment for official purposes only.

b. Properly care for, use, and protect Government equipment entrusted to them.

c. Support their custodian by advising him/her when equipment is transferred into or out of the custodial area.

d. Promptly report any missing property or known incidents of Government property waste, fraud, abuse, or mismanagement to their supervisor, the property custodian, and the headquarters/region /center security divisions.

e. Contractor employees shall promptly report any missing property to their supervisors and Contracting Officers' Technical Representative.

2-7. OFFICE OF FINANCIAL MANAGEMENT. The accounting responsibilities relative to in-use personal property are as indicated in the latest version of FAA Order 2700.31, Uniform Accounting System Operations Manual.

2-8. OFFICE OF INFORMATION SERVICES. The data processing responsibilities relative to in-use personal property are contained in the latest version of Order 1370.52, Information Resources Policy.

2-9. OFFICE OF ACQUISITION SERVICES. The acquisition responsibilities relative to in-use personal property include the responsibility to catalog NAS procurements prior to issuance and provide copies of contract/purchase documentation to the property manager's office.

CHAPTER 3. IN-USE PERSONAL PROPERTY MANAGEMENT CRITERIA

3-1. **GENERAL.** This property includes all facilities and equipment that comprise the National Airspace System (NAS) and its support and administrative property. This includes automated information systems (AIS) equipment and test equipment that support the NAS. The FAA must maintain formal records for identifying, accounting for, controlling, and recording agency in-use personal property. This property has a life expectancy of 2 years or more. The official property records are maintained in the Personal Property In-Use Management System (PPIMS).

3-2. **ACCOUNTABLE PROPERTY.** The following identifies In-Use Personal Property that must be recorded in a formal personal property accounting system. This property is controlled by an identification system and supporting records from acquisition through disposal.

a. **Installed Facility Equipment.** Installed facility equipment includes electronic, electrical, or mechanical equipment installed at air traffic control, air navigation, and other operating facilities in the NAS, regardless of price.

b. **Installation Charges.** Installation charges include the cost to transport the equipment to the installation site, labor, travel, overhead, and other costs incurred to place the equipment in service. Examples of "other costs" included within installation charges are initial testing of the equipment and flight checking the equipment.

c. **Line Item Accountable.** This includes stand-alone equipment owned by the FAA and excludes installed facility equipment (as defined above).

(1) Accountable property managed on an "itemized basis", is identified by a Property Identification Number (PIN) or Bar Code Number (BCN), and is recorded in the official property records.

(2) Itemized property must meet one of the criteria contained in Appendix 6, Accountable Equipment Categories. It also includes property leased by the FAA or loaned or borrowed for 90 days or more regardless of dollar value.

3-3. **NON-ACCOUNTABLE PROPERTY.** Non-accountable property is defined as personal property not reportable to the PPIMS database. property managers, property custodians, and FAA employees shall ensure that all FAA property, reportable or non-reportable, receives proper care and is used only for official purposes. Non-accountable property shall be reported to the property disposal officer when no longer required in accordance with the latest version of

FAA Order 4800.2. Some non-accountable property is difficult to control and may easily be misused for personal gain or for other reasons. In this particular case, non-accountable property may be assigned accountable status at the request of the custodian and approval of the Property Officer.

3-4. CONTROL OF IN-USE PERSONAL PROPERTY.

a. Use FAA Form 4650-11, Memorandum Receipt, when property is removed from its assigned location, leased, borrowed, or loaned for short terms (less than 90 days). This form may be used for tracking both accountable and non-accountable equipment. The form can also be used to assist tracking of equipment provided to employees for use in their daily workload for record keeping purposes. See Appendix 3, Figure 6, for a sample of this form.

b. For temporary removal of property from FAA facilities, use Form DOT F 1660.2, Property Removal Record. A sample of this form is provided as Appendix 3, Figure 1. This protects both the custodian and the individual removing the property. It shows that the individual has the right to remove the property from FAA premises, and the custodian has documentation for control purposes.

3-5. ASSET CLASSIFICATION AND OWNERSHIP.

a. **Asset Classification.** This is a classification of in-use personal property that generally identifies and groups like items. FAA organizes its accountable property records in various classifications to properly manage and control them. A listing of asset classifications is contained in Appendix 7.

b. **Ownership Codes.** The codes are used to identify who owns the property recorded in the official property records. Ownership codes are contained in Appendix 8.

3-6. GOVERNMENT FURNISHED PROPERTY/CONTRACTOR ACQUIRED PROPERTY (GFP/CAP)

GFP/CAP. Although GFP and CAP generally are excluded from this order, there are instances where this type of equipment is provided to the contractor from agency inventories and removed from the PPIMS database. There are also instances when a contractor returns property to the Government, and the FAA must make a determination whether to dispose of the equipment or re-utilize within the FAA.

(1) If equipment recorded in PPIMS is unrequired to the agency's needs and is determined to be useful to an FAA contract, equipment is generally removed from PPIMS for contractor use in accordance with the contract provisions. This is accomplished by filling out an FAA Form 4650-12 to transfer the equipment to the contractor. See Appendix 3, Figure 7.

(2) The responsibility for tracking the equipment becomes a provision of the contract and must be coordinated with the Contracting Officer (CO) and/or Property Administrator (PA).

(3) When equipment is no longer required by the contractor, an FAA Form 4650-12 is used to transfer responsibility of the equipment back to the Government. At this point, the FAA must determine whether the equipment will be re-utilized or if disposal action is necessary. Equipment returned to the FAA is coordinated with the PDO. If the equipment is to be disposed of, the equipment is to be reported to the PDO as unrequired property, in accordance with Chapter 5 of this Order. If the equipment is re-utilized, the FAA Form 4650-12 is used to transfer the equipment back to the PPIMS database on the property records of the using organization.

3-7. SPECIAL PROPERTY CONSIDERATIONS.

a. Automated Data Processing Equipment (ADPE) - **Software.** Commercial-off-the-shelf software (COTS) purchased or licensed and valued at \$2,500 and above must be recorded in PPIMS. The custodian controls the use/movement of such software from a central control point. FAA-owned software is capitalized if the unit cost is \$25,000 or greater, and the software has an estimated life expectancy of at least 2 years.

b. ADPE - **Hardware.**

(1) Computers that serve a dual administrative and operational function and meet the sensitive dollar threshold are recorded as an individual line item in the official property records. NAS computer equipment used to support only the NAS is recorded as installed facility equipment.

(2) External ADPE components \$500 and above will be recorded in PPIMS as individual line items. Examples include central processing units (CPU), monitors, printers, local area network components (excluding cabling), and external disk drives.

(3) Internal ADPE components valued under \$500 that are an integral part of the computer should be captured in the total dollar value of the computer. Record internal components including modems, electronic boards/cards, add-on integrated circuits, etc., as part of the value of the CPU or other end item in which they are to be installed. If an internal component is replaced with a like item, no price adjustment is necessary.

c. **Recording Leased Equipment.**

(1) **Capital Lease.** An installment lease, known as a capital lease, will eventually transfer the item to the agency. Capital leased equipment must be recorded on the accountable records in PPIMS as leased equipment (ownership code 8). At the end of the lease period, the equipment becomes FAA-owned equipment and is identified as such (ownership code 1) in the PPIMS database.

(2) **Operating Lease.** A rental lease, known as an operating lease, does not transfer the ownership benefits to the lessor. Operating leased equipment may be tracked via the accountable records or through an authorized alternative method. If an alternative method is selected for tracking operating leased equipment, the property manager and the using office must approve it.

d. **Donated Property.** Donated property must be given to the FAA free of any compensation, rights, privileges, or future profit. It will be recorded in PPIMS based on established accountable equipment categories with an estimated value. Clear supporting documentation for donated property through the local legal office.

3-8. **PROPERTY IDENTIFICATION NUMBER (PIN) OR BAR CODE NUMBER (BCN)/LABELS.**

a. The PIN/BCN is a unique number assigned to each itemized piece of FAA accountable in-use personal property. Immediately on receipt of accountable property items/equipment, affix the label in a highly visible position, and normally in the front right hand corner of the item. This will ensure items are easily accessible for taking inventory.

b. It may be impossible to affix a label to some items, such as software; however, a PIN/BCN should be assigned and maintained in a "property label file" for recordation and inventory purposes. If a label is lost or damaged, a replacement label shall be affixed and the appropriate adjustment shall be made in PPIMS.

3-9. **RECORDATION OF PROPERTY VALUE.** Accountable line items will be recorded on the basis of actual cost, invoice cost, or estimated cost at time of acquisition. Installed facility equipment costs are separated into two categories. They are installed facility equipment costs and installation costs. Installed facility equipment costs are the actual costs for the equipment being installed. Installation costs include the costs to transport the equipment to the installation site, labor, travel, overhead, and other costs incurred to place the equipment in service.

16

17

CHAPTER 4. PERSONAL PROPERTY IN-USE MANAGEMENT SYSTEM (PPIMS) SYSTEM STANDARDS

4-1. **GENERAL.** PPIMS is FAA's official national system used to track and manage in-use personal property. PPIMS maintains vital data on property and is used to support the agency's financial statement and general ledger accounts. It receives vital data from the Regional Project Materiel Management System (RPMMS). The Logistics and Inventory System (LIS) and Facilities, Services and Equipment Profile (FSEP) also provide data to PPIMS through the Field Inventory Replenishment System (FIRS). It also provides output to the accounting and financial system, RPMMS, and other organizational lines of business. The PPIMS database is comprised of the following four files:

a. **National Stock Number (NSN)/Item Description File.** This file identifies and provides item identification for common like items. NSN's are assigned to assets in accordance with the latest version of FAA Order 4500.3, Participation in Federal Catalog and Standardization Program. Suffix codes are added to NSN to differentiate one manufacturer item from another. The key data elements are NSN, description, part number, and Commercial and Government Entity (CAGE) code.

b. **Facility Table File.** This file provides facility identification and summaries of facility dollar values by custodial area within a Region/Center/Headquarters. It creates property accounts specific to each property custodial area and facility within the FAA. It contains installed facility equipment, installation charges, and total number of line items charged to a custodial area. The key data elements for this file are the cost center, facility location identifier, facility type, facility contraction, facility name, and new fields (i.e., swap dates, commissioning dates, status codes and responsibility codes.)

c. **Suspense File.** This file is the primary control used by the accounting office to review and monitor property updates to PPIMS. Accounting personnel enter certain due-in transactions followed by (1) subsequent matching input from the in-use Property Officer, or (2) entering dates by document number for data previously entered by the in-use Property Officer, or (3) requisition data received from LIS or other procurement sources. Key data elements for this file are the transaction code, document number, item number, item number quantity, received quantity, unit cost, and received amount.

d. **Itemized Property File.** This file identifies, records, and controls individual pieces of property as assigned to each property custodian. It consists of NSN/item description data and facility data and contains subsidiary data applicable to individual itemized pieces of property. Data is entered and maintained by the property manager from source documents submitted by the property custodians.

4-2. **PPIMS ACCESS.** Access varies according to the requirements of those using and/or maintaining the system. Access is restricted by functional users of the system and to those responsible for performing assigned functions.

a. **Application Manager.** This user normally is the in-use property manager or officer. This individual has access to all production directories and is responsible for implementing approved modifications to software programs.

b. **Application User (Update).** This user has direct access to the PPIMS database. These individuals have the capability, by data input, to update the database. Access to the production directories is limited to a read and executes capability only.

c. **Application User (Query-Only).** This user normally can only inquire on the PPIMS database. However, the functional capability is limited to read only. Access to the production database is limited to a read capability only.

d. **Application User (Field Input).** This user has access to query and record update capabilities. Users are able to create or access live records and make changes in a work file, which is electronically forwarded to Logistics for review and update to PPIMS by Property Management Office.

4-3. **PPIMS DATA ELEMENTS.** These data elements are needed to identify and describe property; record property value, location, quantities, movement, and accountability; create audit trails of transactions processed; produce output reports; and for other program management purposes. PPIMS data elements are contained in Appendix 9. (See Appendix 10, Special Program Management Codes, for a listing and description of each code.)

4-4. **SOURCE DOCUMENTS.** These forms are used by the in-use Property Officer to identify property item additions, changes, and deletions. Appendix 3 provides a listing of these forms and their titles. Samples of these forms are provided as Figures 1 through 10, in Appendix 3. (This list is not all-inclusive but contains the majority of forms used to record property actions).

a. Information contained in PPIMS source documents is used to create and maintain PPIMS records.

b. Along with source documents, FAA uses the following two forms to capture PPIMS needed information:

(1) **FAA Form 4650-17, Receiving Document Code Strip.** This form is used when there is only a single line entry. See Appendix 3, Figure 9, for a sample of this form.

CHAPTER 5. PROCESSING REQUIREMENTS

5-1. **CREATING A RECORD.** A property record consists of all in-use personal property capitalized or selectively managed and controlled for a custodial area. In-use property records are created, changed, and deleted in PPIMS via transaction codes. See Appendix 11, PPIMS Transaction Codes. Property actions occur continuously through logistics, accounting, or other program areas. Examples of record change actions include:

a. **Property Addition/Increase.** A property addition/increase is the result of new or additional items when the recordation criteria are not identified as Asset Class 61. Asset Class 61 is Facility Equipment which is identified in Appendix 7.

b. **Property Transfer.** A property transfer is the movement of equipment between two locations internal to the agency.

c. **Property Record Corrections.** Property record corrections are changes involving data elements, value adjustments, or physical inventory adjustments. All property record corrections or changes must be documented and reported to the property manager's office.

d. **Property Deletion/Decrease.** Property deletions/increases are changes that may be the result of loans, transfers, disposal action, or removal from PPIMS due to report of survey. All property deletions and decreases must be documented and approved by the property manager's office.

5.2 REGIONAL PROJECT MATERIEL MANAGEMENT SYSTEM (RPMMS) INTERFACE.

a. **RPMMS to PPIMS.** An interface file is created each month at the end of RPMMS input cycle. This interface moves F&E project materiel records from RPMMS to PPIMS when assets are closed out. This data is moved to a PPIMS work file (PMCWRK) for review. The in-use property manager reviews records for accuracy of location description. The accounting offices review records for completeness of project capitalization dollar accuracies. Records can be corrected, new records added, duplicate records deleted, and quantities and values changed prior to processing them into PPIMS. The physical and financial aspects of PPIMS are updated as follows:

- (1) Facility equipment
- (2) Installed facility equipment charges
- (3) Itemized property

b. **PPIMS to RPMMS.** PPIMS moves outgoing files (NSN and facility information) to RPMMS. Each month two files are created, which include current PPIMS NSN catalog and facility table file data. Once created, the files are interfaced into RPMMS. This allows the transfer or closeout of accountable property from RPMMS to PPIMS, using accurate, up-to-date National Stock Number and Facility Table information. This file update can be done on an as-needed basis throughout the month, but is routinely done at a minimum of once a month coinciding with the month-end process.

5-3. **FACILITY TABLE AND NSN UPDATES.** The in-use property manager maintains PPIMS facility table and NSN item description files.

a. **Facility Table Updates.**

(1) For property to be added to a PPIMS facility record, the facility to which the property belongs must first be identified in the Facilities Service and Equipment Profile (FSEP) and subsequently in the PPIMS Facility Table.

(2) **Facility Identification.** Updates are done through a monthly-automated interface from the Field Inventory Replenishment System (FIRS). This interface receives and processes the monthly updates from the FSEP of all AF NAS facilities. As a result of receiving the IN015 Report from FIRS, the in-use property manager loads the IN015 creating the PP321R1, Automatic Facility Table File Update List. Appendix 12, Figure 13, provides a sample of this report). Utilizing the combination of the two reports, the in-use property manager manually updates location information within PPIMS and automatically loads the monthly changes submitted within the last 30 days. This effort is performed on an ongoing monthly basis and strives to provide a mirror image of the NAS facility changes, as well as any other administrative facility changes in other lines of business within the FAA. The in-use property manager manually adds, modifies, deletes, or supersedes facility identification (e.g., name, location, etc.) within FIRS and PPIMS for all other lines of business, which do not fall under the Airway Facilities line of business.

b. **National Stock Number Updates.**

(1) Prior to an asset being recorded within PPIMS, it must have an NSN assigned and recorded within the PPIMS National Stock Number Table.

(2) **Item Identification.** If the item is not listed in the item description file or if the NSN is unknown, the in-use property manager requests a stock number through the LIS Centralized Catalog System. Prior to recording property in PPIMS, a stock number (NSN, Logistics Stock Number (LSN)/"8200") must be assigned. All stock numbers must be obtained from LIS centralized catalog system. A stock number must be present in this PPIMS NSN file before item descriptive data can be recorded in PPIMS. No other local stock numbers are authorized for use in PPIMS.

5-4. **FIELD INVENTORY REPLENISHMENT SYSTEM (FIRS) INTERFACES.**

PPIMS data input is received through source documents or monthly records/reports generated by FIRS. These records are transferred to PPIMS by use of the following two file transfer processes:

a. Facility Service and Equipment Profile (FSEP). This is a monthly file depicting the total records of all NAS operational facilities within the regions/centers/headquarters and field offices. These operational facilities include all facilities specifically maintained or supported by the Airway Facilities field offices. The following facilities offices may be excluded, as they are not considered NAS operational facilities:

(1) NAS Implementation Engineering Center (ANI) offices located either in the regions or field and headquarters.

(2) All "administrative headquarters" types of Airway Facility division offices such as those in regions/centers/headquarters, as these are not typically "NAS operational facilities that control air traffic."

(3) All other non-AF offices, including all other lines of business organizations, field, Assistant Administrator for Region and Center Operations (ARC) offices, Air Traffic divisions, Flight Standards divisions, etc.

(a) The FSEP is utilized for multiple purposes to support staffing requirements, facility scheduled outages, status of facilities, i.e., commissioned, decommissioned, etc. Part of the FSEP is the Pre-commissioned Facility File (PFF), which tracks those facilities in the construction phase that are not yet operational or in service. The FSEP interface to FIRS provides current updates and deletes and/or changes facility designations to the subsidiary property systems. This is done primarily by editing against the cost center code, facility location identification, numeric facility type, facility contraction, supply support code, inventory location code, and facility status. Although the files and systems are totally independent of each other, PPIMS must mirror the facility identification process established within the FSEP and RPMMS for audit purposes. The FIRS interface process ensures this mission is accomplished.

(b) The FIRS receives the latest cumulative monthly updates made within the FSEP via the updated Facility Master File.

(c) The FIRS compares the files to the previous month's history file and produces multiple "IN" reports based on FIRS program requirements. The steps for this process are as follows:

1 The IN010, IN020, and IN025 monthly reports are produced to reflect current facility changes in the file and to denote input errors, which need to be corrected within the FSEP file itself. FIRS produces the IN015 report, which will capture all successful FSEP entries for loading into PPIMS as well as any other administrative entries made manually by the in-use property manager for other lines of business outside of Airway Facilities.

2 The in-use property manager loads the IN015 to PPIMS; an edit report (PP321R1) is produced and reviewed by the in-use property manager prior to updating location information in the PPIMS Facility Table file. The PP321R1 report provides editing notes as to whether a facility has been added, decommissioned, meets deletion criteria, etc.

3 The in-use property manager manually makes corrections or additions to the facility location data element field within PPIMS based upon the information provided within the PP321R1. Once these actions have been completed, the in-use property manager transmits this file update to RPMMS on an as-needed basis in Order to provide RPMMS the most recent facility table information to perform closeouts.

b. Financial Detail Records (FDRs). The FDR is another automated file interface process to the FIR, and subsequently to PPIMS, and a manual interface to the accounting. The FDR interface is made up of all requisitions by FAA regions Ordered via LIS and shipped to FAA field facilities from the FAA Logistics Center or directly from a vendor. The regional accounting offices receive weekly and monthly FDR transfers from the FAALC through FIRS, via the IN040 reports, which they utilize to balance against interoffice transfer vouchers received and entered into the accounting and financial system. The logistics offices receive the monthly composite file containing all transactions with no job order in the job order field or with INUSE in the job field. All other FDR transfers are interfaced with RPMMS. Through a sorting/editing process within FIRS, these transactions are distributed through several edit/review reports. This enables the In-Use Property Manager to determine which of the items Ordered require accountability tracking and recordation.

(1) FIRS transfers all applicable FDR's or requisition transactions meeting PPIMS criteria for review and determination as to whether they meet criteria for installed facility equipment, installation charges, and/or itemized property within PPIMS.

(2) The logistics offices work with accounting to add new items not previously recorded, facilitating the follow-up process for recordation with the field. The FDR records for accountable property are transferred to PPIMS via this FIRS interface process on a monthly basis.

(3) It creates reports that can be reviewed (the PP351, PP357, and PP361R1) and can be manually added back to PPIMS by either accounting or logistics division personnel. Samples of these reports are shown in Appendix 12, Figures 10, 11, and 12. When editing is finished, batch processing adds the data into the PPIMS database. The result of the batch update is the requisition activity reflected in the PP330, Facility Follow Up List, as well as the Suspense File, PP327. Samples of these reports are included as Appendix 12, Figures 5 and 6.

5-5. **ADDITIONS/INCREASES.** Appendix 11, PPIMS Transaction Codes, provides a listing of transaction codes and descriptions for additions/increases. Use the following procedures to report changes to the property record for new acquisitions, return of loaned property, project materiel transferred from another system or reutilization of excess or surplus property:

a. Complete all receipt processing actions.

(1) Review data contained on the source documents. If supplemental data are needed to complete necessary information on a source document, attach FAA Form 4650-17, Receiving Code Strip. If multiple items are on the receipt/purchase document, use FAA Form 4650-18, Personal Property Data Entry Form.

(2) Within 3 workdays, forward the source document with attached forms (if applicable) to the property manager. One copy of the source document should be held in a custodial suspense file until the transaction prints out on the Monthly Processed Transaction Report. See Appendix 12, Figure 2, for a sample of this report.

b. Initial issue items Ordered from the FAA Logistics Center are shipped to the requesting organization with a source document, e.g., FAA Form 4250-4, Shipping Order. See Appendix 3, Figure 2.

c. When the custodian receives a new item with this document, the custodian will validate the paperwork against the item received. If there is only one item on the document, the custodian can place FAA Form 4650-17 on the face of the document. Fill in the appropriate data, and forward to the property manager for processing. Be sure that the document has a property description of the items. If there is more than one item on the source document, the custodian should use the FAA Form 4650-18, Personal Property Entry Form. Fill in the appropriate information, sign it, and forward to the Property Manager for processing data into PPIMS. (NOTE: Each item must have a property description).

5-6. **PROPERTY TRANSFERS.** Appendix 11, PPIMS Transaction Codes, provides a listing of transaction codes and descriptions for transfers. A transfer of equipment can occur between property custodians, regions/centers/headquarters, and between FAA and a contractor. Use the following procedures to document and report transfers of personal property:

a. **General Transfer Procedures.** Transfers require action by both the losing and gaining organizations. Transfers involving non-excess property must be approved and authorized in writing by the In-Use Property Officer of the losing Region/Center/Headquarters office. In an emergency situation, the transfer may be made without written approval; however, the losing In-Use Property Officer will document such transfers within 3 days. Procedures for transfers are as follows:

(1) The losing custodian prepares FAA Form 4650-12, Materiel Requisition/Issue/Receipt, (see Appendix 3, Figure 7) by completing blocks 1 through 10 in Part A; blocks 11 through 19 in Part C.6. If the property is on record, the custodian enters the PIN or BCN in block 12 immediately below the NSN and completes blocks 20 through 25 on the bottom portion of Part D. If the property is not on record, the custodian will draw a diagonal line across the entire bottom half on Part D and annotate "not on record."

(a) Mail copies 1 and 2 of FAA Form 4650-12 to the custodian in the gaining Region/Center/Headquarters.

(b) Mail copy 3 to the in-use property manager in the gaining Region/Center/Headquarters.

(c) Enclose copy 5 with the property being shipped.

(d) Mail copy 4 to the losing in-use property manager.

(e) File copy 6 in the suspense file until the delete transaction is shown on the Monthly Processed Transaction List, (PP312).

(2) Upon receipt of the property (including copy 5) and copies 1 and 2 of FAA Form 4650-12, the gaining custodian completes block 2 in Part A; blocks 20 through 25 in the top half of Part D; and blocks 26, 27, and 28 within 3 days. The gaining Custodian then:

(a) Forwards copy 1 to the gaining In-Use Property Manager.

(b) Returns copy 5, acknowledging receipt, to the losing In-Use Property Officer.

(c) Files copy 2 in suspense until the receipt is shown on the Monthly Processed Transaction Report.

b. Emergency Transfers. Transfers required to meet emergency situations for operating facilities may be made without prior approval; however, such transfers must be reported to the In-Use Property Officer within 3 days. Approval for transfers between custodians in the same Region/Center/Headquarters may be obtained by telephone.

c. Property Transfers between Custodians in the same Region/Center/Headquarters. Procedures for transfers between custodians in the same Region/Center/Headquarters are as follows:

(1) The losing shipping custodian prepares FAA Form 4650-12 completing blocks 1 through 10 in Part A; blocks 11 through 19 in Part G, including a statement that the property is or is not on the property records. If the property is on record, the custodian will enter the PIN or BCN in block 12 just below the NSN and complete blocks 20 through 25 on the bottom portion of Part D. If the property is not on record, the custodian will draw a diagonal line across the entire bottom.

(2) Enclose copy 3 with the property.

(3) Keep copy 4 as part of the custodial record.

(4) Upon receipt of the shipment, the receiving (gaining) custodian will keep a copy of FAA Form 4650-12 as part of the custodial record.

d. Property Transfers Within the Same Custodial Area. Property transfers within the same custodial area require the approval of the custodian. To initiate a record change, use one of the following methods:

(1) Using a copy of the PPIMS Property Management Report, circle the PIN or BCN of the item being transferred and enter the new data (cost center, location, facility type, etc.) above the line. Forward a copy to the in-use Property Officer, and file a copy in suspense until the transaction is shown on the Monthly Processed Transaction Report. The Property Custodian must sign the amended copy of any Official Property Record before it is forwarded to the Property Manager.

(2) Prepare FAA Form 4650-18. On the first line, enter the PIN/BCN and the unit value. On the second line, enter only the new data (e.g., location code, facility type code, etc.). If the cost center changes, enter the new code in the Cost Center Code block and forward a copy to the in-use Property Officer. File one copy in suspense until the transaction prints out on the Monthly Processed Transaction Report.

5-7. PROPERTY DELETIONS. Appendix 11, PPIMS Transaction Codes, provides a listing of transaction codes and descriptions for deletions. Property deletions are always documented and approved by the in-use property manager.

a. Complete all delete processing actions.

(1) Review data contained on the source documents and provide appropriate justification. If supplemental data is needed to complete necessary information on a source document, attach FAA Form 4650-18, Personal Property Data Entry Form.

(2) Within 3 workdays, forward the source document with attached forms (if applicable) to the property manager. One copy of the source document should be held in a custodial suspense file until the transaction prints out on the Monthly Processed Transaction Report.

b. Unrequired property should be reported electronically using the USD-produced facsimile of FAA Form 4800-1, Report of Excess Property. A sample is contained in Appendix 3, Figure 8. In specific circumstances, manual process of the form or use of other documents sufficient for providing needed data may be used if approved by the Region/Center/Headquarters Property Disposal Officer (PDO). The custodian or PDO maintains oversight to ensure reports are complete and accurate information is provided. The unrequired property is screened within the FAA in accordance with the latest version of FAA Order 4800.2, Utilization and Disposal of Excess and Surplus Personal Property. If the property is unrequired by the FAA, it will be reported as excess for federal screening. The custodian remains responsible for the property until disposition is made. The PDO will send disposition instructions to the custodian.

c. Lost, damaged, or destroyed personal property is processed in accordance with the latest version of FAA Order 4630.3, Survey of Lost, Damaged, or Destroyed Government Personal Property. The PIN/BCN, when applicable, is entered on the FAA Form 4630-8, Report of Survey, (See Appendix 3, Figure 4). The original copy is sent to the in-use Property Officer for processing, and one copy is filed in a custodial suspense file until the decrease or deletion is shown on the Monthly Processed Transaction Report.

5-8. PROPERTY RECORD ADJUSTMENTS. Document all corrections and report them to the property manager. Corrections may involve data element changes or physical inventory adjustments.

a. **Data Elements.** Make corrections using a copy of the Property Management Report or FAA Form 4650-18. For the Property Management Report, annotate the corrected data above the line, and sign and date the report. For FAA Form 4650-18, on the first line enter the PIN/BCN and amount, and on the second line, enter only the corrected data (NSN, serial number, etc.). For either method, forward one copy of the report or form to the property manager and file one copy in a custodial suspense file until the transaction print out appears on the Monthly Processed Transaction Report.

b. **Physical Inventory Adjustments.** Complete inventory adjustments in accordance with Chapter 6 of this order.

c. **Mass Corrections.** PPIMS has some capabilities to accomplish mass changes of records. The procedures for mass changes are part of the system documentation maintained by PPIMS-lead region (Western-Pacific). Custodial requests for a mass change of records must be submitted to, and approved by, the in-use Property Officer who performs the change.

d. **Exchange and Repair (E&R) Actions.** The designated person in the field will return the item to FAA Logistics Center (FAALC) when a piece of test equipment that no longer functions cannot be repaired, it may be replaced with a new item. If the new item meets the criteria, recordation in PPIMS is called an E&R transaction. An E&R transaction replaces the old item data in PPIMS with the new item's serial number, BCN, and/or modified price. The new item will be issued by the FAALC with a return document for the old item. Once the new item and return document are received, the old item is returned to the FAA Logistics Center.

e. If an E&R item is returned, source forms FAA Form 4250-5, Equipment Return Document, Appendix 3, Figure 3, should be used to identify the item returned by entering the PIN and unit price in the "From" block and the serial number in the "Equipment Serial Number" block. The voucher number should also be legible on the form. Staple both forms together and forward them to the Property Manager. One copy of each form will be filed in suspense until the transaction prints out on the Monthly Processed Transaction Report.

f. Using a copy of the Official Property Record, enter the notation "E&R" in the left-hand margin next to the property identification number of the item being replaced by the E&R transaction. Circle the data changed by the transaction (serial number, equipment type, price, etc.), and enter the new data above the line. Forward one copy to the property manager, and file one copy in suspense until the transaction prints out on the Monthly Processed Transaction Report. Appendix 12, Figure 20, provides a sample of a Physical Inventory Report.

5-9. CUSTODIAL REPORTING IN THE ABSENCE OF SUPPORTING DOCUMENTATION.

a. When insufficient documentation exists, the custodian should submit copies of available documents; e.g., packing slips, bills of lading, or other shipping documents, or BCN documents to the in-use property manager to identify any purchase order or contract number on the documentation. In addition, the custodian shall complete and sign FAA Form 4650-18, and forward the entire document package to the in-use Property Officer. The custodian should verify that the item has been received and ensure that it is not listed on the PP330R1, Personal Property Follow-up List. See Appendix 12, Figure 8, for a sample PP330R1.

b. When no documentation exists or received documentation is illegible, the custodian completes FAA Form 4650-18, signs it, annotates on the form "no other documentation exists," and sends a copy to the in-use Property Officer.

5-10. PPIMS FIELD INPUT.

a. The field input program was developed to allow custodians to submit electronic updates to property records through a work file in PPIMS. The purpose of this process is to improve the managing capabilities of Logistics by shifting the responsibilities of processing individual records to the property custodian. This process allows Logistics to review, to approve all updates to property records, and to reduce the possibilities of erroneous data incorporated in the master PPIMS database.

b. Logistics assigns a unique nine-position user identification code to each field user. The user identification code automatically restricted when PPIMS end of month process begins. It is comprised of:

Example: USER ID: AWPPPCFSR

AWP: Region/Center/Headquarters designation code

PP: PPIMS (Personal Property In-Use Management System)

C: Field input user

F: Users last name

SR: Facility

c. The Batch identification is a six-digit alpha/numeric code, which is system-generated in the format shown below:

Example: BATCH ID: SR302?

SR: Facility of the user

302: Julian date assigned by system

?: Sequential alpha/numeric character assigned by the user

d. The document number is a five digit alpha/numeric code which is system-generated in the format provided below:

Example: DOCUMENT NUMBER: F302?

F: Initial assigned to user, usually the first letter of the last name

302: Julian date taken from batch identification

?: Sequential alpha/numeric character assigned by the user

e. Transaction codes applicable to a field-input user are as follows:

00 = Received from the FAALC

06 = Regional funded purchases

51 = Inventory adjustment – increase

22/52 = Record data change

24/54 = Exchange and repair adjustment

26/56 = NSN/Model number change

27/57 = Transfer within a custodial area

f. Source documentation with all the data element fields completed is required for all property and documentation. The source documentation must contain the typed name and signature of the custodian or delegate and must be dated.

g. After completion of the field batch it is electronically forwarded to the Property Manager's office for review and update into PPIMS.

h. For additional guidance contact your Property Manager's office for PPIMS Field Input User Guide.

CHAPTER 6. PHYSICAL INVENTORY

6-1. **INVENTORY REQUIREMENTS.** The objective of physically inventorying in-use personal property is to ensure that the PPIMS records are current, accurate, and complete. The inventories support the applicable general ledger balances in Order for the agency to prepare financial statements for receiving a clean financial opinion. The inventory process validates the identity, physical accountability, and condition of property. The following paragraphs identify responsibilities regarding in-use personal property physical inventories:

a. The In-use Property Manager:

- (1) Establishes local procedures for physically inventorying in-use personal property under his/her control.
- (2) Reviews and evaluates the results of physical inventories to see if there are any weaknesses in systems, procedures, documentation, or organizational and personnel performance.
- (3) Certifies and approves record adjustments (not involving actual loss). In cases of actual property loss, ensures adjustments are made in accordance with the latest version of FAA Order 4630.3, Survey of Lost, Damaged, or Destroyed Government Personal Property.
- (4) Reconciles and processes results of all inventory packages to the personal property system.

b. Property Custodian:

- (1) Inventories in-use personal property items when requested by applicable elements or in accordance with established standards and timeframes referenced in this chapter.
- (2) Provides appropriate documents to the In-Use Property Manager for all transactions affecting physical inventories.
- (3) Ensures appropriate action is taken with collected inventory data.

c. FAA employees: The ultimate responsibility of the property custodian is to ensure that inventories are conducted in accordance with written policy and procedures. Each employee shall make all equipment assigned to him or her available during the inventory as required by the property custodian.

6-2. CONDUCTING INVENTORIES. If resources are available, establish inventory teams to perform independent inventories of all personal property an organizational element. The in-use Property Officer and the custodian for the organization for which they are responsible and/or have PPIMS update authority should not participate in physical inventories. The exceptions to this are remote sites located away from a region, center, or headquarters office. They can accompany inventory takers either to provide assistance or to serve as an advisor. Another exception is Firearms Inventory. There are no regional requirements for this type of inventory with the exception of the Alaskan Region and the William J. Hughes Technical Center. Inventories for firearms should be conducted in accordance with FAA Order 1600.69, FAA Facility Security Management Program.

6-3. TYPES AND FREQUENCIES OF INVENTORIES.

a. Initial Inventory. This is the first physical inventory of any property after acceptance by FAA for establishing property records and verification related to financial records. It is used when establishing control for verification of individual property items after fabrication or procurement.

b. Triennial Inventory. This is a physical inventory required every 3 years for each custodial area. The property manager or designee has the option of scheduling inventories during the same year or using the cyclic inventory as described in paragraph 6-3a. This is to ensure that the entire Region/Center/Headquarters has performed an inventory once every 3 years in accordance with DOT Order 4410.4 and the FPMR regulation 41 CFR 101.

c. Joint Inventory. This type of inventory is required prior to the change of custodians. outgoing and incoming custodian must simultaneously conduct inventories. The outgoing custodian is responsible for all adjustments prior to the acceptance of the inventory by the incoming custodian. Both custodians must sign the required memo (see Appendix 5) transferring responsibilities to the incoming custodian. Should circumstances prevent a joint inventory, acceptance of responsibility transfers to the next higher level of supervision until such time a new custodian completes and accepts the inventory. If this inventory occurs within the same year as the scheduled triennial inventory, this inventory may be accepted as the triennial inventory.

d. Wall-to-wall Inventory. This is a physical inventory of all in-use personal property within a custodial area or the entire Region/Center/Headquarters. The property manager may request a wall-to-wall inventory if he/she deems necessary.

e. **Special or Spot-Check Inventory.** These inventories are scheduled separately from regularly scheduled inventories whenever it is necessary to evaluate the accuracy of records and systems. It normally is restricted to instances where the results desired cannot be provided by the regularly scheduled inventory. If the monetary value of pending reports of survey for any custodial area (or multiple custodial area) is 10 percent or more of the total property value at any time, the in-use property manager has the option to schedule an inventory within a year after such facts are known.

f. **Validation of Installed Facility Equipment.** Data reflecting the installed facility equipment and installation Charges for each custodian's facility is printed along with line-item accountable property on the inventory report. Validation of the values and facility identifications must be included in the inventory process. Decommissioned facilities should be reviewed to have the dollar values removed from PPIMS with source documents described in Chapter 4 of this Order. There is also a primary responsibility to mirror the facility identification process established within the FSEP in the PPIMS Facility Table File.

g. **Federal Information Processing (FIP).** Annual inventories are to be conducted and reported to the regional, center, or headquarters' Information Resource Manager (IRM) in addition to the In-Use Property Officer. This requirement is in accordance with Order DOT H 4410.4.

6-4. PREPLANNING ACTIVITIES GUIDELINES. The purpose of the preparation phase of the inventory process is to ensure organizations are ready for the actual physical count. The activities may include the following:

- a. Determining the custodial area to be inventoried.
- b. Conducting a walk-through to identify accountable personal property and area.
- c. Reviewing inventory requirements for property located within a custodial area.
- d. Coordinating with organizations, programs, and personnel impacted by the inventory.
- e. Publishing the inventory cycle, including the inventory beginning and ending dates, cutoff dates for document processing, inventory method, training schedule for inventory team, and categories of equipment to be inventoried.

f. Processing any pending documentation for update to PPIMS prior to the beginning of the inventory.

g. Reviewing reports of survey from the previous inventory through the last current period to identify problems that may require special attention in inventory planning.

6-5. TAKING PHYSICAL INVENTORIES. The inventory process consists of a physical examination of in-use personal property and a review of custodial areas to make sure all items are properly and accurately recorded in PPIMS. Property personnel are to refrain from performing any transfers, disposals, etc., while actually conducting the inventory. These actions are to be completed during the preparation phase, prior to inventory reports being generated, to prevent discrepancies and reconciliation problems during the resolution phase. Instructions for performing a physical inventory are provided in Appendix 13. A sample of the Certification Statement is provided as Appendix 14.

6.6. RESOLVING INVENTORY DISCREPANCIES. The inventory discrepancy resolution phase resolves inventory discrepancies and reconciles the physical count in PPIMS. Discrepancies must be corrected as part of this process. Corrective actions may be annotated on the inventory report in accordance with Appendix 14, Certification Statement for Inventory Lists.

6-7. DISCREPANCY RESEARCH AND RECORD ADJUSTMENT. Discrepancies of property on hand and related data in the accountable property records may be detected during scheduled or special inventories. When a discrepancy is detected, the property custodian determines the cause through record research.

a. Research, reconciliation, and subsequent adjustments of accountable property records are done after completion of the inventory count. The custodian completes an inventory adjustment voucher using FAA Form 4640-1. See Appendix 3, Figure 5, Adjustment Voucher.

b. Research all property records for equipment not found during an inventory. Determine the depth of research in accordance with the following guidelines, applying sound judgment.

(1) If the property item adjustment is between \$500 and \$2,500 inclusive, only minor research is required; e.g., a brief review of transaction history and receipt/issue documentation.

(2) If the property item adjustment is more than \$2,500, detailed research is required; e.g., an extensive review of transaction history and receipt/issue documentation. Research can include telephone and/or personal interviews with security personnel and written investigations.

c. Preparation of property item adjustments in any predetermined problem area that received special attention during inventory taking or inventory planning requires detailed research.

d. Report property not found after research on a Report of Survey, FAA Form 4630-8, in accordance with the latest version of FAA Order 4630.3.

6-8. INVENTORY ADJUSTMENT. This is action taken to adjust the accountable property record and subsequently the related financial record when there is an unresolved difference between the quantity of assets on hand and the quantity shown in the accountable property record.

a. Process inventory adjustments only when valid accountable transactions such as shipments, receipts, turn-ins, and transfers do not account for discrepancies between record balances and physical counts for assets. Inventory adjustments are properly used when:

(1) The loss or gain is unexplained because the reason for the discrepancy could not be identified through research.

(2) The discrepancy is attributable to the incorrect identification of an item of accountable personal property.

(3) There is no reason to suspect negligence, misuse, theft, or fraud.

b. Inventory adjustments are promptly prepared and processed in PPIMS, as required, with sufficient copies issued to the originator, the approving official, if required, the property manager's office, and the regional accounting office.

c. Inventory adjustments are accompanied by and appropriately cross-referenced to the annotated custodial listing (the physical inventory listing) to provide control documentation and data.

d. The in-use Property Officer retains the record file of the annotated inventory listing with a copy to the regional accounting office.

e. Property custodians document and investigate accountable property found at the organizational site being inventoried, meets the reporting criteria for accountability in PPIMS, and those not already recorded in PPIMS.

6-9. PREPARATION OF INVENTORY ADJUSTMENTS. Either the property management program or the type of property inventoried dictates the adjustment data inserted in the body of the form. An example of data, which would be required, is shown in Appendix 3, Figure 5. In instances where the adjustment contains credit adjustments reflecting the write-off of property, the following certification is required:

I certify that credit adjustments reflected on this form are the result of inventory discrepancies, and that there is no reason to suspect neglect, misuse, theft, or fraud of property. See Appendix 3, Figure 5, Adjustment Voucher.

6-10. AUTHENTICATION OF INVENTORY ADJUSTMENTS. The following actions are required when inventory adjustments are prepared and processed:

a. The person responsible for preparing adjustments indicates all pertinent facts to support the adjustment action.

b. The approval official approves the adjustment or returns it to the originator with instructions for further research if any line item entries on the adjustment or supporting documentation are not acceptable.

c. The following levels of approval are established for inventory adjustments:

(1) The Property Officer approves inventory adjustments on a facility basis not to exceed \$50,000.

(2) The Logistics Division Manager, or equivalent, approves inventory adjustments on a facility basis not to exceed \$200,000.

(3) The Regional Administrator, Center Director (or the Deputy Director), or headquarters lines of business, approve inventory adjustments on a facility basis exceeding \$200,000. However, these adjustments must be reported in writing to headquarters (AFZ-1, Attn: AFZ-500).

6-11. **DOCUMENTATION.** Use the following vouchers, listing, or forms to officially record or adjust physical inventories of in-use personal property:

- a. FAA Form 4640-1, Adjustment Voucher.
- b. Custodian's property listing (inventory listings) obtained from property records and printed NSN as recorded in PPIMS.
- c. FAA Form 4630-8, Report of Survey for Lost, Damaged, or Destroyed Government Personal Property.

6-12. **CRITERIA FOR WAIVER OF INVENTORY.**

a. Physical inventories of property are required in accordance with the minimum frequencies prescribed in this Order. The Director of Resources Management, AFZ-1, may authorize a waiver of these requirements when unforeseen happenings occur that delay taking a scheduled inventory. These occurrences include, but are not limited to, temporary loss of key personnel; national emergencies; fire, flood, or other national disasters. A request for a waiver of inventory must be submitted in writing to the NAS Logistics Property Management Division, AFZ-500. Requests are to include the following information:

- (1) Type of property inventory involved.
- (2) The date of the last inventory and the period of the waiver.
- (3) The date the inventory will be resumed.
- (4) A brief statement as to the reason for the request.

b. Custodial area(s) are to take a special inventory as soon as practical after the end of the period for which the waiver has been granted.

c. Waiver of inventory of any custodial area for more than one frequency period is not permissible.

11

12

13

14

CHAPTER 7. PROPERTY MANAGEMENT REPORTS

7-1. GENERAL. PPIMS output reports and lists vary according to both accounting and logistics requirements. The available reports/lists identified below are produced specifically for property manager and/or custodial use.

7-2. PREPARATION AND DISTRIBUTION. All PPIMS property management reports must be produced and distributed under one of two options, as provided in the system:

- a. Reports are printed by the Region/Center/Headquarters data processing division and mailed directly to custodians and the property manager as appropriate.
- b. Reports are transferred by telecommunications from the host region and are printed in the satellite/serviced region or center then distributed by the Property Manager.
- c. Distribution of reports will be in accordance with the distribution statements listed below. Additional distribution requirements are subject to Property Manager discretion on a Region/Center/Headquarters basis.
- d. Reports/lists may also be pulled on an ad hoc basis utilizing the report selection screens in the PPIMS Utility Functions.

7-3. DAILY PROCESSED TRANSACTION LIST (PP101).

- a. Purpose/Content. This list displays the data on all transactions entered or generated in the system. It is used to verify that the data entered are an accurate reflection of the data contained on the applicable source document. (See Appendix 12, Figure 1.)
- b. Sequence. Processed Transaction Lists are printed in the sequence by which records are added to the batch.
- c. Frequency. Frequency is whenever a printout is requested.
- d. Distribution. Distribution is limited to Accounting and the Property Manager.

7-4. MONTHLY PROCESSED TRANSACTION LIST BY COST CENTER (PP312).

- a. Purpose/Content. This list contains all transactions and related data processed for the previous month. Property custodians use this list to validate data entry and to clear their suspense file documents. Incorrect data should be annotated, signed and dated, then returned to the Property Manager within 10 calendar days to update the PPIMS database. Failure to return the list within this timeframe will serve as certification that the transactions and related data are correct. See Appendix 12, Figure 2, Sample Monthly Processed Transaction List by Cost Center.

- b. Sequence. Property Identification Number by Facility Identification.
- c. Frequency. Monthly.
- d. Distribution. Property Manager, Accounting, and all applicable Property Custodians.

7-5. AUTOMATIC FACILITY TABLE FILE UPDATE LIST (PP321).

a. Purpose/Content. This listing identifies and provides data on facility changes entered through an automated interface with the Facility Master File. It is used to review and verify physically these changes. It contains both current and changed facility data elements. (See Appendix 12, Figure 13.)

- b. Sequence. Facility Identification.
- c. Frequency. Monthly.
- d. Distribution. Property Manager.

7-6. PROJECT MATERIEL TRANSACTION LISTS (PP324).

a. Purpose/Content. Two lists are produced. One is a list of the automatic input records and applicable data of capitalized project materiel from the Project Materiel System tape, and the second is a list produced from manual entries generated by the property manager. The lists are similar in both content and format. (See Appendix 12, Figure 17.)

- b. Sequence. Facility Identification within PMC batch identification.
- c. Frequency. Monthly.
- d. Distribution. Accounting and the Property Manager.

7-7. PERSONAL PROPERTY FOLLOW-UP LISTS (PP330).

a. Purpose/Content. This listing contains items having an outstanding FDR or Purchase Order (PO) record in the Suspense File over 60 days old. It is used to advise Property Managers of open suspense records, to inform Property Custodians to validate property receipts, and to forward the appropriate documentation to the Property Manager. See Appendix 12, Figure 6, Sample Personal Property Follow-up List.

- b. Sequence. TC: 00, Facility Identification, GSA Address, Inventory Location and Document Number, TC: 06, Facility Identification, Document Number.
- c. Frequency. Monthly
- d. Distribution. Property Manager and Property Custodian as applicable.

7-8. ASSET CLASS SUMMARY LIST (PP342).

a. Purpose/Content. This listing provides summary totals (items and amounts) for each asset class as reflected in the Itemized Property File and Facility Table File. Subtotals are displayed for capitalized items and selectively managed and controlled items. This listing is used for information and reporting purposes. (See Appendix 12, Figure 7.)

- b. Sequence. Asset Class, Ownership Code.
- c. Frequency. Monthly.
- d. Distribution. Property Manager and Accounting only.

7-9. FACILITY TABLE FILE UPDATE LIST (PP345).

a. Purpose/Content. This listing identifies and provides data on facility changes manually entered by the Property Manager. It is used to physically review and verify these changes. It contains both current and changed facility data elements. (See Appendix 12, Figure 9.)

- b. Sequence. Facility Identification.
- c. Frequency. Monthly.
- d. Distribution. Property Manager.

7-10. INTRA-REGION TRANSFER LIST (PP348).

a. Purpose/Content. This is a printout for TC 25 awaiting TC 55 which contains data on property being transferred between custodial areas within the same Region/Center/Headquarters. It is used to track property transfers and advise gaining custodians of property additions/increases. (See Appendix 12, Figure 9.)

- b. Sequence. Consignee, Consignor, and NSN/LSN within Document Number.
- c. Frequency. Monthly.
- d. Distribution. Property Manager, Accounting, and applicable consignee.

7-11. MONTHLY NSN UPDATE REPORT (PP351).

a. Purpose/Content. This list provides a record of NSN/LSN data element changes or NSN/LSN superseding actions accomplished in the NSN Description File. It is used for review/verification that NSN/LSN changes are accurate and complete. It also serves as an audit trail on NSN/LSN record changes. (See Appendix 12, Figure 10.)

- b. Sequence. NSN/LSN and suffix.
- c. Frequency. Monthly.
- d. Distribution. Property Manager.

7-12. FINANCIAL DETAIL RECORD (FDR) REVIEW LIST (PP357, PP361, PP363).

a. Purpose/Content. This list identifies those Financial Detail Records (FDR) for which no matching NSN/LSN exists and is a potential candidate for property capitalization and/or recordation. It is used to make an off-line determination of record entry. (See Appendix 12, Figure 11.)

- b. Sequence. Document Number Line Item, Cost Center, and NSN/LSN.
- c. Frequency. Monthly.
- d. Distribution. Property Manager and Accounting.

7-13. PROPERTY MANAGEMENT REPORT BY COST CENTER (PP405).

a. Purpose/Content. This report is the Property Custodian's "OFFICIAL PROPERTY RECORD." It contains information and data reflecting the total property record for each Custodial Area. This report also may be used to validate all property transactions. Sample of this report is provided in Appendix 12, Figure 14.

- b. Sequence. Facility Identification, Asset Class, and National Stock Number.
- c. Frequency. Quarterly.
- d. Distribution. Property Manager and all Property Custodians.

7-14. ITEMIZED PROPERTY LIST BY NSN (PP410).

a. Purpose/Content. This is a list of the entire Region/Center/Headquarters Itemized Property File. It contains all itemized property data elements. This list is used to identify and locate property when only the NSN/LSN is known. (See Appendix 12, Figure 10.)

- b. Sequence. NSN/LSN, Equipment Type, and Facility Identification.
- c. Frequency. Quarterly.
- d. Distribution. Property Manager. Additional distribution to Property Custodians is optional at the Property Manager's discretion.

7-15. NATIONAL STOCK NUMBER (NSN) DESCRIPTION LIST (PP415).

- a. Purpose/Content. This list provides the characteristic/manufacturer data from the NSN description file. It contains both NSN and suffix related data on each NSN or Logistics Stock Number (LSN) loaded in the file. This listing is used to identify and validate NSN/LSN data for new or existing property. This report also provides Asset Class, Special Management Codes (SPMC), Appendix 9, PMC, Model number, Manufacturer, CAGE Code, and Description. (See Appendix 12, Figure 16, for a sample of this report.)
- b. Sequence. NSN/LSN, Suffix and equipment type.
- c. Frequency. Quarterly.
- d. Distribution. Property Manager. Additional distribution to the property custodian is optional at the property manager's discretion.

7-16. PROPERTY DESCRIPTION LIST BY NOMENCLATURE (PP420).

- a. Purpose/Content. This list provides the nomenclature or manufacturer data from the NSN/LSN description file. It contains both NSN/LSN and suffix related data on each NSN/LSN located in the file. This listing is used to identify and revalidate descriptions for new or existing property. (See Appendix 12, Figure 17.)
- b. Sequence. Nomenclature, equipment type.
- c. Frequency. Quarterly
- d. Distribution. Property Manager. Additional distribution to Property Custodians is optional at the Property Manager's discretion.

7-17. EQUIPMENT TYPE/MODEL NUMBER LIST (PP425).

- a. Purpose/Content. This list provides the characteristic/manufacturer data from the NSN Description File. It contains both NSN/LSN and suffix related data on each NSN/LSN. This listing is used to identify and validate manufacturer data for new or existing property. (See Appendix 12, Figure 18.)
- b. Sequence. Equipment type, manufacturer.
- c. Frequency. Quarterly.
- d. Distribution. Property Manager. Additional distribution to Property Custodians is optional at the Property Manager's discretion.

7-18. FACILITY TABLE LIST (PP430).

a. Purpose/Content. This list provides a total list of all facilities within a Region/Center/Headquarters. It includes facility equipment amounts, installation costs, and facility superseding information. Superseded facilities remain on this list for 180 days; then they are removed. (See Appendix 12, Figure 15.)

b. Sequence. Facility Identification.

c. Frequency. Quarterly.

d. Distribution. Property Manager.

7-19. PHYSICAL INVENTORY REPORTS (PP905R1).

a. Purpose/Content. These reports are used by the Property Custodian to conduct a physical inventory of itemized property. They contain data required to physically identify items through visual inspection of the item's characteristics and are produced in various formats dependent on the sequence selected. A sample of the Physical Inventory Report is provided in Appendix 12, Figure 20.

b. Sequence.

(1) Facility Identification, by NSN within Asset Class.

(2) Facility Identification, by PIN.

(3) Asset Class, by NSN, within Facility Identification.

(4) Asset Class, by PIN, within Facility Identification.

(5) Special Program Management Code, by NSN.

(6) Serial Number, by Cost Center Code

c. Frequency. As required.

d. Distribution. Property Manager and Property Custodians.

7-20. ITEMIZED PROPERTY LIST BY SERIAL NUMBER (PP915).

- a. Purpose/Content. This is a list of the entire Region/Center/Headquarters Itemized Property File. It contains description, manufacturer, and location data. It is used to identify and locate property when serial number is known. (See Appendix 12, Figure 21.)
- b. Sequence. Serial number.
- c. Frequency. As required.
- d. Distribution. Property Manager only.

APPENDIX 1. DEFINITIONS

Accountability. The obligation of each individual using agency personal property to maintain an account, (record), which will provide a complete audit trail from receipt until final disposition.

Accountable Property. A term used to identify Government property, which is recorded in a formal personal property accounting system and is controlled by an identification system and supporting records from its acquisition through disposal.

Accountable Property Records. Formal records of personal property which assign specific responsibility for control to an individual.

Approving Official. The individual designated by a regional administrator or headquarters/center director as having final authority to approve findings and recommendations contained in Reports of Survey. This responsibility may be delegated to the Manager, Logistics Division or equivalent, if such an individual is not also the Property Manager.

Asset Class. Classifications of in-use personal property which generally identifies and groups like items.

Authority. The power to take actions or approve actions of others.

Automated Data Processing Equipment (ADPE). As defined in FIRMR 202-2.001, these items are general purpose, commercially available, mass-produced automatic data processing devices. They include components and the equipment systems configured from them, together with commercially available software packages, that are provided and are not priced separately. See Federal Information Processing (FIP) Equipment.

Capitalized Asset. An accounting concept which identifies property above a selected dollar value and records the acquisition cost of the item in the General Ledger of the agency's financial records. The capitalization level is mandated by the latest version of FAA Order 2700.31.

Capitalized Personal Property. All property with an initial acquisition cost at or above the criteria established by the General Accounting Office, Title II, with a service life of 2 years or more. These assets are recorded in the agency's financial management records.

APPENDIX 1. DEFINITIONS

Contractor Acquired Property. Government personal property acquired or otherwise provided by the contractor for performing a contract and to which the Government has title.

Criticality Code. This code is used to identify test equipment requiring calibration.

Custodial Area. An organizational subdivision of the Region/Center/Headquarters in which the property is physically located and/or by which the property record is maintained.

Custodial Property Record. A record, which includes all in-use personal property, capitalized or accountable item lines, for a Custodial Area.

Expendable Property. Personal property which is consumed in use or loses its identity when used, or becomes a component part of other personal property.

Federal Information Processing (FIP) Equipment. Any equipment or interconnected system or subsystems of equipment in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission or retrieval of data information, and accessorial devices used in support of data processing.

Financial Capitalization. An accounting concept which identifies personal property with a value of \$25,000 and over to a general ledger account for the purpose determining net worth over an extended period of time. The accounting concept of capitalization is not to be confused with property accountability.

Government Furnished Property. Government personal property in the possession of, or directly acquired by, the Government and subsequently made available to the contractor.

In-Use Personal Property. Nonexpendable property assigned to a custodial area which is serving its intended operational purpose and for which accountable records and controls should be maintained. Personal property is complete if it is of a durable nature with an expected service life of 2 years or more, does not ordinarily lose its identity when placed in use, and is permanent in nature.

In-Use Personal Property Officer. This is the person delegated by the Property Manager to perform assigned responsibilities and manage the in-use personal property program.

Life Expectancy. The number of years that an item of equipment can be anticipated to provide useful service when properly maintained in use.

APPENDIX 1. DEFINITIONS

Line Item. A single line entry on a reporting form, which indicates a specific type of equipment having the same description.

Loan Agreements. An executed document between authorized representatives of a loaning agency and a receiving organization, which prescribes the terms and conditions under which FAA provides or receives personal property on a temporary basis.

Non-Accountable Property. Personally charged property. Items of personal property, which may be controlled via the automated accountable system.

Permit. An official written document which allows the use of agency property by a private organization.

Physical Inventory. A periodic physical count of personal property that is actually on hand and the comparison of the counts validate the applicable property records.

Property Accountability. The responsibility to ensure security and conscientious inventory management of actual property. This obligation, imposed by public law, requires maintaining accurate records of personal property assets; conducting physical inventories to reconcile property records; and includes maintaining an audit trail for applicable physical property and financial transactions.

Property Control. The physical and administrative protection of property assets to include their security, location identity, and recordation of property transactions. It also includes the care and protection of property, physical inventory, facility data maintenance, and processing of property transactions.

Property Custodian. The person formally designated (by the in-use Property Officer) in writing by organizational position as being responsible for the management and control of property within a specific custodial area.

Property Identification Number (PIN). A unique six-digit number assigned to each itemized piece of FAA in-use personal property at the time it is initially entered into the Personal Property In-Use Management System (PPIMS). Synonymous with bar code number (BCN).

APPENDIX 1. DEFINITIONS

Property Management. The overall administration of property assets, data, systems, and procedures needed to meet property management requirements and objectives. This includes the establishment and implementation of policy, systems, and procedures for decision-making and the accomplishment of property acquisition, use, transfer, and disposal.

Property Management Officer (PMO). The manager of the NAS Logistics Property Management Division, AFZ-500, is the agency PMO. This individual is responsible for ensuring that the in-use personal property program meets applicable legal and regulatory requirements.

Property Manager. The person formally designated in writing, by name or organizational position, as being responsible for the management and control of personal property within a specified organization.

Property Officer. The person designated in writing, by name or organizational position, as being responsible for the management of a system of accountability and control for personal property within a specified organization.

Reconciliation. The process of matching and adjusting property records for a specific item to all such records to bring them into full agreement and to assure that they accurately reflect the quantity, description, condition, location, custodian, etc., of the item.

Region/Center/Headquarters. In the context of this Order, the organizational area of responsibility for an in-use Property Officer. (These include the FAA Logistics Center, the William J. Hughes Technical Center, FAA headquarters, and each FAA region).

Risk Assessment. A documented review by management of an organization's degree of susceptibility to waste, loss, unauthorized use, or misappropriation that includes consideration of management controls.

Sensitive Items. Items of in-use personal property, which are especially susceptible to theft, loss, conversion to personal use, or for some other reason(s), must be subject to more stringent controls than other property.

Source Document. Forms used by the in-use Property Officer to identify property item additions, changes, and deletions.

Unrequired Personal Property. Property that is no longer needed by the organization to which it is assigned. Normally, this property has not been reported to the General Services Administration.

APPENDIX 2. ACRONYMS

A/C	Asset Class
ADPE	Automated Data Processing Equipment
AFM	Office of Financial Management
AIO	Office of Information Services
AML/ FAALC	FAA Logistics Center
ANI	National Airspace System Implementation
BCN	Bar Code Number
CAD	Contractor Acquired Property
CAGE	Commercial and Government Entity
COTS	Commercial-Off-The-Shelf-Software
CPU	Central Processing Unit
CRIT	Criticality Code
DAFIS	Departmental Accounting and Financial Information System
FAA	Federal Aviation Administration
FDR	Financial Detail Records
FIRS	Field Inventory Replenishment System
FIP	Federal Information Processing
FMF	Facility Master File
FSEP	Facilities, Service and Equipment Profile
GFP	Government Furnished Property

APPENDIX 2. ACRONYMS

IRM	Information Resource Manager
LTOP	Leased To Purchase
NSN	National Stock Number
PDO	Property Disposal Officer
PFF	Precommissioned Facility File
PIN	Property Identification Number
PMC	Project Materiel Code
PMO	Property Management Officer
RPMMS	Regional Project Materiel Management System
T/C	Transaction Code

APPENDIX 3. PPIMS SOURCE DOCUMENTS

APPENDIX 4. SAMPLE DELEGATION OF AUTHORITY

SUBJECT: **INFORMATION**: Delegation of Authority to Sign Accountable
Property Transactions

FROM: Manager, Systems Maintenance Engineering
Branch, AGL-460

TO: Property Manager, Great Lakes Region, and AGL-53B

This letter advises of the delegation of authority to the personnel listed below for signing of accountable property transactions, excess reporting and correspondence related for Cost Center Codes: C8030 & 8033.

Primary:

Name: Lewis Adams Jr. Title: AGL-462.C2 (C8030 & 8033)

Alternates:

Name: Jim Soper Title: AGL-461 (8030)

Name: Leonard Heaton Title: AGL-462 (8030)

Name: Don Hahn Title: AGL-463 (8030)

Name: Steve Diedrich Title: AGL-464 (8030)

I am aware that this delegation authority does not relieve me of the liability, responsibility for proper accounting, care, and effective utilization of Government property assigned to my custody.

James J. Heinen
Property Custodian

APPENDIX 5. SAMPLE MEMORANDUM - CHANGE OF CUSTODIAN

SUBJECT: **INFORMATION**: Change of Custodian

FROM: Manager, Custodial Area

TO: Property Manager, (Show organization designator here)

This memorandum advises you of the change of custodial responsibility for all accountable property assigned to (cite custodial area), which includes the following cost centers.

Cost Centers

The effective date of Custodian transfer is DD/MM/YY. The attached PPIMS Property Management Report, as annotated, and applicable adjustment vouchers (FAA Form 4640-1) with supporting documentation represents the custodial area's official property records as of the effective date.

We certify that all property listed herein has been jointly inventoried, and all data shown thereon are true and correct to the best of our knowledge. Responsibility for this property is hereby transferred.

Outgoing Property Custodian

Incoming Property Custodian

APPENDIX 6. ACCOUNTABLE EQUIPMENT CATEGORIES**Mandatory Sensitive Items Regardless of Price**

1. Ammunition
2. Firearms

Mandatory Sensitive Items \$500 and Above

1. Audio Visual Equipment
2. Automated Data Processing Equipment (ADPE)
3. Photographic Equipment
4. Portable or Telecommunications Equipment (i.e., telephones, beepers)
5. Recording Equipment
6. Test Equipment, Portable and Rack Mounted

Selectively Managed Items \$1,000 and Above

1. Appliances
2. Athletic Equipment
3. Avionics Equipment
4. Capital Leased, Borrowed, Loaned Equipment
5. Commissary Equipment
6. Emergency Readiness Equipment
7. Fire, Rescue, and Safety Equipment
8. Food Serving and Preparation Equipment
9. Laboratory and Medical Equipment
10. Landscaping/Lawn Equipment
11. Maintenance, Repair Shop, Electrical, and Hand Tools
12. Metal-working Machinery
13. Office Machines (including fax/copier/printer combinations)
14. Ship and Marine Equipment
15. Training Equipment
16. Vehicles, Special Purpose (including tractors)

All Items \$2,500 and Above are Accountable, including IRM Software

All Items \$25,000 and Above Are Accountable and Capitalized

APPENDIX 13. PHYSICAL INVENTORY******* ALL CORRECTIONS SHOULD BE IN RED INK *********MARK the inventory listing as follows:**

1. For all correctly matched line item entries, place a RED check mark to the left of the PIN/BAR code.
2. Correct a record or expand on the description, use RED ink to UNDERLINE the incorrect field. (Example: If the serial number needs to be corrected, underline it in RED, and write the correct serial number above it in RED.)
3. DO NOT draw a line through the record.
4. DO NOT add new items to the inventory listing.
5. Complete all blank fields if information is available, by inserting information into the correct column of this listing using RED ink.
6. If the cost center, location, or facility code is incorrect for any line item, UNDERLINE it in RED, and write the correct cost center, location, and/or facility code above it in RED.
7. Transfers within a custodial area: Underline the PIN/BAR code in RED, write XFER, the new cost center code, facility location, and facility type above the record in RED.
8. E&R (EXCHANGE & REPAIR). Write E&R beside PIN/BAR code in RED. UNDERLINE the appropriate fields in RED that will be changed. Print the corrected information in RED above the appropriate field(s) of the old item. Submit code stripped FAA FORM 4250-4, and 4250-5 with the completed inventory.
9. Excess Property. Write "XS" in RED beside the PIN/BAR code, and the USD excess report number. Submit a copy of the excess report with the completed inventory.
10. Missing items. Write "ROS" in RED beside the PIN/BAR code, and write "Report of Survey Attached" in RED above the record. Submit the Report of Survey with the completed Inventory.
11. After the physical inventory has been conducted and the adjustments annotated, complete the "Certification Statement" on the last page.

APPENDIX 13. PHYSICAL INVENTORY INSTRUCTIONS

12. For additional information on the standards for physical inventory or preparation of documentation, refer to the latest version of FAA Order 4650.21, Management and Control of In-Use Personal Property. Return required inventory list(s) to the property manager along with associated documentation.
